

Our exclusive **Stair ReCrafting** system transforms your old, tired, carpeted stairs into beautiful hardwood stairs... quickly and inexpensively.

## What is Stair ReCrafting™?

**Signature WoodCrafters**, a division of Signature Companies, can change your old stairs into a showcase of custom hardwood stairs at a fraction of the cost.

- Carpeted stairs are easily updated with solid hardwood, handcrafted, pre-finished treads and risers.
- *Stair ReCrafting* fits over your existing staircase, keeping your stairs in service during the installation process.
- Save up to two-thirds the cost of a complete replacement and tear-out without the inconvenience and mess.
- Most stair projects are completed with same day installation. Rail replacements can be completed within 2 days.
- Our solid hardwood treads will last a lifetime and can be resanded and refinished in place, just like hardwood floors, when normal wear-and-tear occurs.

**Call us today** to make an appointment and make the transition from tired, carpet-grade stairs to exquisite hardwood stairs & railings, creating a new look to your most valuable investment—your home.

19 standard stain colors are available to match all the most popular flooring suppliers.
